// address: Šoltanska 20, Split

About Me {

Informatics graduate with a strong foundation in computing concepts, problem-solving skills and having an eye for a detail. Through education engaged in various projects and coursework that involved web application development. Knowledge consists of object-oriented programming, computer architecture, database development and web design. Proficient in performing manual testing and ensuring sofware quality throughout the development llifecycle. Adept at developing and implementing test cases, troubleshooting, and ensuring software quality. Strong analytical skills and proven track record of delivering high-quality products. Proven success in meeting tight deadlines. Excellent communication, work ethic, time managemnent and teamwork skills. Motivation for pursuing a career in QA industry comes from passion to learn how things work in detail, to look at things from various perspectives and using them to find weak spots.

}

Education {
